## This month

Growth concerns continued as the Federal Reserve's monetary tightening forecast drove market sentiment throughout April. The central bank indicated they would be prepared to raise interest rates as quickly as needed to combat inflation, even at the risk of causing a shallow recession. The Fed's increasingly hawkish stance led to continued pressure in fixed income markets. Adding to the global inflation concerns was the war in Ukraine, which exacerbated supply fears after Putin demanded Russian gas be paid for in roubles.

European equity markets reacted positively to Macron's victory in the French presidential election. Eurocentric Macron is likely to favour a collaborative response to Russian aggression.

In China, the zero Covid policy employed by President Xi Jinping continues to add to global supply chain difficulties, especially as Shanghai, China's biggest port, moved into a strict lockdown. Despite these stresses, corporate earnings proved resilient as many companies were able to transfer cost pressures to their customers. Earnings were inconsistent in the tech space, which led to a further sell off at the end of the month.

## RETURN METRICS\*

**NET PERFORMANCE:** The SIMPS low risk performance is shown after Tribe's management fee (0.25%) and the underlying fund managers' fees (OCF of 0.52%\*\*) have been deducted. But it does not include platform and adviser charges. Please note, for the period since inception to 28 February 2022 performance is reported net of VAT.

**BENCHMARK\*\*\*:** ARC Benchmarks are calculated by collecting actual performance from over fifty investment managers. The cautious PCI is suitable for strategies with a relative volatility of 0-40% of global equities as measured by MSCI ACWI.

IN APRIL 2020 TRIBE CHANGED INVESTMENT REPORTING PLATFORM. DURING THE MIGRATION THE VAT APPLICABLE ON TRIBE'S ANNUAL MANAGEMENT CHARGE WAS NOT INCLUDED AS A COST WHEN CALCULATING THE PERFORMANCE RETURNS. WE WANT TO SHOW INVESTMENT RETURNS AFTER ALL COSTS, SO THIS MEANT THAT PERFORMANCE WAS OVER-STATED BY APPROXIMATELY 5 BASIS POINTS PER YEAR. FOR THE MEDIUM RISK SIMPS THE CUMULATIVE EFFECT OF THIS ERROR SINCE THE INCEPTION OF THE PORTFOLIO WAS -0.38%, AS THE INCORRECT CUMULATIVE RETURN SINCE INCEPTION WAS STATED 55.5% WHEN THE CORRECT RETURN SHOULD HAVE BEEN 55.2%. THIS AFFECTED FACTSHEETS THAT WERE PRODUCED FROM APRIL 2020 TO OCTOBER 2021. WE HAVE REMOVED THESE FACTSHEETS AND CORRECTED THEM. FROM 28 FEBRUARY 2022, VAT IS NO LONGER APPLICABLE SO ALL PERFORMANCE IS NOW SHOWING NET OF TRIBE'S FEE AND DOES NOT INCLUDE VAT.
