

Sustainable Impact Model Portfolio Service (SIMPS)

High risk | June 2022 | For financial advisers

Portfolio description

The SIMPS Portfolio range provides a combination of risk-adjusted returns and positive impact: investing that **does well** and **does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on **actively managed asset allocations** across equities, fixed income and cash. We invest in funds which align with our investment philosophy; businesses that **avoid controversies**, are **well run** and **solving major global challenges**.

This month

Global markets experienced another very tough quarter. Multi asset portfolios continued to suffer from the pressure of a sell-off in both equities and bonds, driven primarily from concerns about rising inflation.

In June, global stocks fell into bear market territory (defined as a 20% fall from the high point), as the markets digested an unexpected re-acceleration of the US Consumer Price Index in May, after unease in April. This upward price pressure was widespread, but it was the energy and food prices which were largely responsible for the increases. Global oil prices were pushed higher due to sanctions on Russia and a reduction in refining capacity. This was partially due to covid related closures and resulted in petrol prices doubling since early 2021. The upward price pressure on food also continued, increasing 10% year on year in May in the US. The same trends were evident in the Eurozone and the UK, where countries have also recorded generational high inflation figures in Q2.

There was a swift response from the Federal Reserve who decided to raise interest rates by 75 basis points (bps), higher than previously anticipated, which increased year end rate forecasts in the US and internationally. Global bonds fell 8% in the quarter as the market adjusted its expectations.

RETURN METRICS*

IN APRIL 2020 TRIBE CHANGED INVESTMENT REPORTING PLATFORM. DURING THE MIGRATION THE VAT APPLICABLE ON TRIBE'S ANNUAL MANAGEMENT CHARGE WAS NOT INCLUDED AS A COST WHEN CALCULATING THE PERFORMANCE RETURNS. WE WANT TO SHOW INVESTMENT RETURNS AFTER ALL COSTS, SO THIS MEANT THAT PERFORMANCE WAS OVER-STATE BY APPROXIMATELY 5 BASIS POINTS PER YEAR. FOR THE MEDIUM RISK SIMPS THE CUMULATIVE EFFECT OF THIS ERROR SINCE THE INCEPTION OF THE PORTFOLIO WAS -0.38%, AS THE INCORRECT CUMULATIVE RETURN SINCE INCEPTION WAS STATED 55.5% WHEN THE CORRECT RETURN SHOULD HAVE BEEN 55.2%. THIS AFFECTED FACTSHEETS THAT WERE PRODUCED FROM APRIL 2020 TO OCTOBER 2021. WE HAVE REMOVED THESE FACTSHEETS AND CORRECTED THEM. FROM 28 FEBRUARY 2022, VAT IS NO LONGER APPLICABLE SO ALL PERFORMANCE IS NOW SHOWING NET OF TRIBE'S FEE AND DOES NOT INCLUDE VAT.

NET PERFORMANCE: The SIMPS high risk performance is shown after Tribe's management fee (0.25% plus) and the underlying fund managers' fees (OCF of 0.82%**) have been deducted. But it does not include platform and adviser charges. Please note, for the period since inception to 28 February 2022 performance is reported net of VAT. Past performance is not a reliable indicator of future results.

BENCHMARK*:** ARC Benchmarks are calculated by collecting actual performance from over fifty investment managers. The steady growth PCI is suitable for strategies with a relative volatility of 60-80% of global equities as measured by MSCI ACWI.
