

Sustainable Impact Model Portfolio Service (SIMPS)

Growth | June 2025 | For financial advisers and their clients

Portfolio description

The **SIMPS Portfolio** range provides a combination of risk-adjusted returns and positive social and environmental change: investing that **does well and does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on actively managed asset allocations across equities, fixed income, listed alternatives and cash. We invest in funds which align with our investment philosophy; businesses that **minimise controversies**, are **well run** and are **solving major global social and environmental challenges**.

We updated the names of the SIMPS portfolios in March 2025. The **“medium-high risk” portfolio is now called “growth.”** Some third-party platforms may still show the old name while updates are being made.

This quarter The second quarter of 2025 opened with US President Trump announcing sweeping trade tariffs, which were mostly aimed at countries where the US runs its biggest trade deficits. Investors worried about higher costs, strained global ties, and rising inflation. But, a last-minute 90-day delay gave markets some breathing room. This, along with encouraging progress in trade talks—particularly with China, South Korea, and the UK—helped lift investor confidence.

Corporate earnings came in strong, and job data remained solid. After a spike in early inflation expectations, the pressure eased by quarter-end, helped by steady wage growth and a resilient economy.

One clear effect of Trump’s trade threats was a weaker US dollar. Markets were unsettled by Trump’s push to pull back from global trade and reduce US interest rates, making the dollar less attractive. The Chair of the Federal Reserve, Jerome Powell, resisted the pressure and held rates steady to keep prices stable.

In Europe, Germany’s new government removed a cap on public spending earlier in the year. This unlocked major investment plans, which were announced in Q2—€46 billion in tax cuts and €500 billion for defence and infrastructure. The move boosted confidence across the region, supporting European markets and strengthening the euro heading into the second half of the year.

SIMPS GROWTH	10.6%
ARC STEADY GROWTH PCI	9.0%
SDG ADVENTUROUS COMPOSITE	10.4%

Volatility is measured as the standard deviation of monthly returns since inception. We believe this is more representative of the risk associated with our long term strategic asset allocation, we do not use an annual figure.

SDG ALLOCATION

The UN Sustainable Development Goals (SDGs) are the blueprint to achieve a better and more sustainable future for all. To help translate the Goals into the **SIMPS portfolios** we show revenue weighting and overall alignment to the SDGs.

THE SDG ALLOCATION CHART ABOVE REPRESENTS A BREAKDOWN OF THE SPECIFIC SDGS BEING SUPPORTED IN THE PORTFOLIO BY REVENUE WEIGHTING. 38% OF IDENTIFIED REVENUE CAN BE DIRECTLY ATTRIBUTED TO MEETING THE SDGS IN THE SIMPS GROWTH PORTFOLIO. NORMALISED TO 100% IN THE CHART ABOVE.¹

SDG ALIGNED REVENUE: measures the revenue alignment of products and services which support the delivery of the SDGs.

SDG MISALIGNED REVENUE: measures the revenue misalignment of products and services. Some businesses may have both aligned and misaligned impacts associated with their services (e.g. a waste management business which focuses on recycling, but sends some material to landfill).

¹ Based on 67% of total portfolio. Excludes government bonds, cash and mortgage-backed securities. Impact data is provided from the following sources: Matter, ClarityAI, underlying companies' latest available public reports and third-party fund holdings as at 31/12/2024. Reporting timetables vary company by company.
