

Sustainable Impact Model Portfolio Service (SIMPS)

Balanced | September 2025 | For financial advisers and their clients

Portfolio description

The **SIMPS Portfolio** range provides a combination of risk-adjusted returns and positive social and environmental change: investing that **does well and does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on actively managed asset allocations across equities, fixed income, listed alternatives and cash. We invest in funds which align with our investment philosophy; businesses that **minimise controversies**, are **well run** and are **solving major global social and environmental challenges**.

We updated the names of the SIMPS portfolios in March 2025. The **“medium risk” portfolio is now called “balanced.”** Some third-party platforms may still show the old name while updates are being made.

This quarter For most of Q3, market sentiment was positive, supported by a range of factors. In the US, new trade and tariff agreements added clarity to a complex global picture. While details remain unclear, markets appear to believe the US has come out ahead. The US government secured investment pledges from key trading partners like Japan and the EU, while new import tariffs boosted federal revenue—all of which helped pass a more generous budget, including extended tax cuts for businesses and high earners.

Corporate earnings, especially in the tech sector, were stronger than expected, with AI-related companies leading. Many are US-based, driving American markets higher. In September, the Federal Reserve cut interest rates for the first time in 2025, which also lifted global bond markets.

Emerging Markets (EM) and Developed Asia saw the strongest gains. These regions benefit from two key trends. First, countries are seeking new trade links outside the US, with a near-final deal between Indonesia and the EU as one recent example. Second, the prospect of a weakening US dollar (USD) as the US begins cutting interest rates is also positive for EM. With US rates now falling, other central banks may soon follow – helping to further support growth.

THE SDG ALLOCATION CHART ABOVE REPRESENTS A BREAKDOWN OF THE SPECIFIC SDGS BEING SUPPORTED IN THE PORTFOLIO BY REVENUE WEIGHTING. 39% OF IDENTIFIED REVENUE CAN BE DIRECTLY ATTRIBUTED TO MEETING THE SDGS IN THE SIMPS BALANCED PORTFOLIO. NORMALISED TO 100% IN THE CHART ABOVE.¹

SDG ALIGNED REVENUE: measures the revenue alignment of products and services which support the delivery of the SDGs.

SDG MISALIGNED REVENUE: measures the revenue misalignment of products and services. Some businesses may have both aligned and misaligned impacts associated with their services (e.g. a waste management business which focuses on recycling, but sends some material to landfill).

¹ Based on 56% of total portfolio. Excludes government bonds, cash and mortgage-backed securities. Impact data is provided from the following sources: Matter, ClarityAI, underlying companies' latest available public reports and third-party fund holdings as at 31/12/2024.
