Sustainable Impact Model Portfolio Service (SIMPS)

Cautious | June 2026 | For financial advisers and their clients

Portfolio description

The **SIMPS Portfolio** range provides a combination of risk-adjusted returns and positive social and environmental change: investing that **does well** and **does good**. The portfolios aim to achieve capital appreciation whilst reducing investment risk via a diversified, multi asset class portfolio.

The strategy is based on actively managed asset allocations across equities, fixed income, listed alternatives and cash. We invest in funds which align with our investment philosophy; businesses that **minimise controversies**, are **well run** and are **solving major global social and environmental challenges**.

We updated the names of the SIMPS portfolios in March 2025. **The "low risk" portfolio is now called "cautious."** Some third-party platforms may still show the old name while updates are being made.

PORTFOLIO FACTS AS AT: 30/06/2026

LAUNCH DATE: 30/11/2016

BENCHMARK: ARC Cautious PCI, SDG Cautious Composite

PORTFOLIO OBJECTIVE: Balance between capital preservation and capital appreciation

MANAGEMENT FEE: 0.25%

OCF OF UNDERLYING FUNDS: 0.43%**

This quarter

Global markets ended the second quarter on a stronger footing, despite periods of geopolitical uncertainty. Artificial intelligence (AI) continued to drive stock markets, particularly companies supplying the semiconductors, memory and electrical infrastructure needed to support growing computing demand. However, investors became more cautious about some of the world's largest technology companies, questioning whether the significant sums being invested in AI will generate sufficient long-term returns.

Energy markets were another important influence. Oil and natural gas prices initially rose as tensions around Iran increased, before falling sharply in June as concerns over disruption to global energy supplies eased. Lower energy prices helped reduce inflation concerns and supported bond markets, particularly in Europe, where economies are more reliant on imported energy. Expectations for future interest rate cuts also recovered as these pressures eased.

Against this backdrop, we increased our allocation to businesses supporting electricity grids, energy storage and AI infrastructure. We modestly reduced our overall allocation to bonds as higher US inflation created some pressure, while selectively adding to short-dated UK government bonds when yields rose. Our renewable energy infrastructure exposure also fell slightly following the acquisition of one of our holdings.

RETURN METRICS*

	SINCE INCEPTION		CALENDAR YEARS (1 JAN - 31 DEC)				
	TOTAL RETURN	ANNUALISED	2025	2024	2023	2022	2021
SIMPS CAUTIOUS	38.6%	3.5%	5.4%	2.3%	5.2%	-11.3%	4.1%
ARC CAUTIOUS PCI	31.5%	2.9%	6.8%	4.6%	3.7%	-7.6%	4.2%
SDG CAUTIOUS COMPOSITE	20.0%	1.9%	6.7%	-3.3%	2.7%	-14.8%	-3.0%

Sources for return metrics graph and table: Bloomberg & ARC Private Client Indicies (PCI)

NET PERFORMANCE: The SIMPS Cautious performance is shown after Tribe's management fee (0.25%) and the underlying fund managers' fees (OCF of 0.43%**) have been deducted. But it does not include platform and adviser charges. Since inception (SI) periods show performance from 30 November 2016 to 30 June 2026. Please note, for the period since inception to 28 February 2022 performance is reported net of VAT. Past performance is not a reliable indicator of future results.

BENCHMARK***: ARC Benchmarks are calculated by collecting actual performance from over 50 investment managers. The 'SDG composite' is a benchmark of passive indices comprising 50% iShares MSCI Global Sustainable Development Goals ETF, 40% Lyxor Core Bond, 10% iShares Ultrashort Bond.

RISK METRICS

TO 30 JUNE 2026	VOLATILITY
SIMPS CAUTIOUS	6.0%
ARC CAUTIOUS PCI	4.1%
SDG CAUTIOUS COMPOSITE	6.3%

Volatility is measured as the standard deviation of monthly returns since inception. We believe this is more representative of the risk associated with our long term strategic asset allocation, we do not use an annual figure.

PLEASE NOTE: All asterisk references link to the disclaimer at the bottom of page 5 of this factsheet.

TOP 10 UNDERLYING EQUITY HOLDINGS - AS AT 31/12/2025

TAIWAN SEMICONDUCTOR MANUFACTURING — **PORTFOLIO WEIGHT: 0.8%**

The world's largest dedicated semiconductor foundry, manufacturing chips that power energy-efficient electronics, renewable energy systems, and electric vehicles.

SCHNEIDER ELECTRIC — **PORTFOLIO WEIGHT: 0.5%**

A global leader in energy management and industrial automation, helping businesses and buildings reduce energy consumption and transition to clean power.

NVIDIA — **PORTFOLIO WEIGHT: 0.4%**

Designer of graphics processing units (GPUs) and AI computing platforms that accelerate scientific research and the development of energy-efficient data centre infrastructure.

THERMO FISHER SCIENTIFIC INC — **PORTFOLIO WEIGHT: 0.4%**

Provides laboratory instruments, diagnostics, and life sciences tools that support healthcare, pharmaceutical development, environmental testing, and disease surveillance.

MICROSOFT — **PORTFOLIO WEIGHT: 0.3%**

A global technology company providing cloud computing, AI tools, and digital access that help enable sustainability and inclusive economic growth.

XYLEM INC — **PORTFOLIO WEIGHT: 0.3%**

A water technology company that develops smart solutions for water treatment, distribution, and efficiency, helping address global water scarcity and infrastructure challenges.

INTACT FINANCIAL CORP — **PORTFOLIO WEIGHT: 0.3%**

Canada's largest property and casualty insurer, integrating climate risk into its products and helping communities build resilience against extreme weather events.

AUTODESK INC — **PORTFOLIO WEIGHT: 0.3%**

Provides design and engineering software used to create more sustainable buildings, infrastructure, and manufactured products, reducing material waste and carbon footprint.

AIA GROUP — **PORTFOLIO WEIGHT: 0.3%**

A pan-Asian life insurance and financial services group promoting healthy living, financial inclusion, and long-term wellness across underserved populations in Asia.

MASTERCARD — **PORTFOLIO WEIGHT: 0.3%**

A global payments technology company advancing financial inclusion by connecting unbanked and underbanked populations to digital financial services, while also driving initiatives around carbon footprinting and sustainable commerce.

The top 10 underlying equity holdings represent the top 10 equity exposures held in an aggregated list of each funds' underlying holdings in the portfolio.

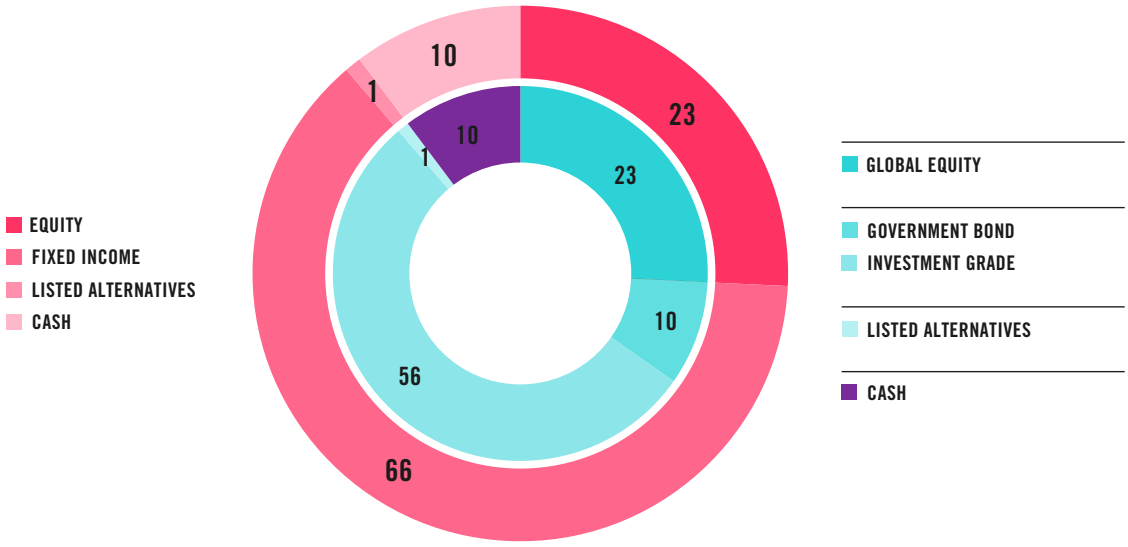
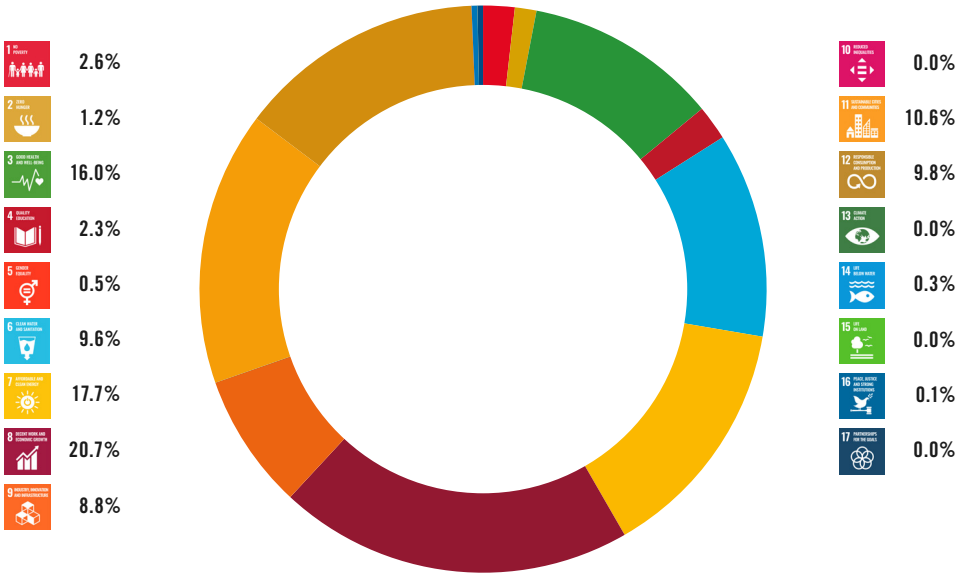
ASSET ALLOCATION - AS AT 30/06/2026

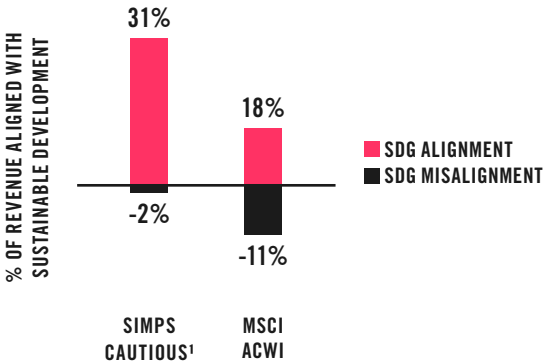


SDG ALLOCATION

The UN Sustainable Development Goals (SDGs) are the blueprint to achieve a better and more sustainable future for all. To help translate the Goals into the **SIMPS portfolios** we show revenue weighting and overall alignment to the SDGs.



THE SDG ALLOCATION CHART ABOVE REPRESENTS A BREAKDOWN OF THE SPECIFIC SDGS BEING SUPPORTED IN THE PORTFOLIO BY REVENUE WEIGHTING. 31% OF IDENTIFIED REVENUE CAN BE DIRECTLY ATTRIBUTED TO MEETING THE SDGS IN THE SIMPS CAUTIOUS PORTFOLIO. NORMALISED TO 100% IN THE CHART ABOVE.[1]



SDG ALIGNED REVENUE: measures the revenue alignment of products and services which support the delivery of the SDGs.

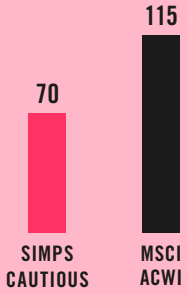
SDG MISALIGNED REVENUE: measures the revenue misalignment of products and services. Some businesses may have both aligned and misaligned impacts associated with their services (e.g. a waste management business which focuses on recycling, but sends some material to landfill).

[1] Based on 35% of total portfolio. Excludes government bonds, cash and mortgage-backed securities. Impact data is provided from the following sources: Matter, ClarityAI, underlying companies' latest available public reports and third-party fund holdings as at 31/12/2025. Reporting timetables vary company by company.

PORTFOLIO IMPACT PERFORMANCE

Carbon intensity[1]

The equities in the SIMPS Cautious portfolio are **39% less** carbon intensive than the MSCI ACWI benchmark.



TONNES OF CO_2 / $M SALES

Businesses with lower carbon intensity demonstrate their operational efficiency and release less carbon into the atmosphere per pound of revenue.

Source: MSCI & US EPA Carbon calculator as at 31/12/2025.

Carbon saved[1]

By investing £100,000 into the SIMPS Cautious portfolio rather than the MSCI ACWI benchmark, you save **0.4 tonnes** of carbon dioxide (CO_2) if invested for 12 months.

This represents:

THE CARBON EMITTED BY:
0.4 flights from London to New York (economy class)

THE CARBON SEQUESTERED BY:
6 medium grown coniferous tree seedlings grown for 10 years

THE CARBON AVOIDED BY:
0.1 tonnes of waste recycled instead of going to landfill

Healthcare provided[2]

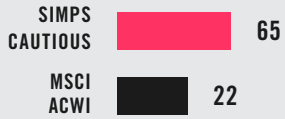
Across all equity fund holdings[2] in the SIMPS Cautious portfolio, **51 companies provide access to healthcare.** Out of these, **27 report** on the number of people who received access to healthcare.

In total, these 27 companies have provided healthcare to **900,762,012** people this reporting year.

That's the equivalent of **0.2** people for each £100,000 invested in the SIMPS Cautious portfolio for 12 months.

Renewable energy generated[3]

Amount of renewable energy generated from renewable sources per £m revenue.



ENERGY USED EQUIVALENT TO:
24 UK houses powered for 1 year[4]

Waste recycled[3]

Volume of waste recycled rather than sent to a landfill.

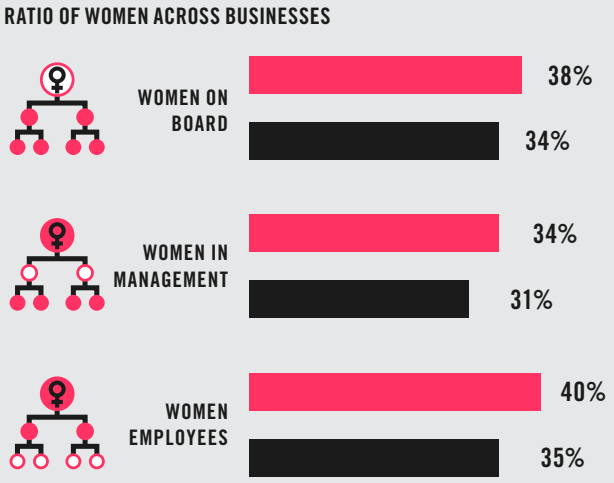
[1] Based on scope 1 and 2 emissions of covered listed equities (20% of portfolio holdings).

[2] Based on healthcare companies which constitute 3.6% of portfolio holdings.

[3] Third-party fund holding data as at 31/12/2025. Based on 20% of portfolio holdings. Impact data is provided from the following sources: Clarity AI, Matter, and the underlying companies' latest available public reports. Reporting timetables vary company by company.

[4] Source: Ofgen, using "medium" sized UK house average (2.7 MWh per year)

Tribe | IMPACT CAPITAL



Gender representation[5]

The ratio of women empowerment across businesses–are women being promoted proportionately?

WOMEN ON BOARD: the portfolio's weighted average of women on company boards.

WOMEN IN MANAGEMENT: the portfolio's weighted average of women in leadership and management positions

WOMEN EMPLOYEES: the portfolio's weighted average of women in the workforce.

SIMPS CAUTIOUS
MSCI ACWI

[5] Third-party fund holding data as at 31/12/2025. Based on 20% of the portfolio holdings. Impact data is provided from the following sources: ClarityAI, Matter, and the underlying companies' latest available public reports. Reporting timetables vary company by company.

IMPORTANT INFORMATION This factsheet is marketing material for use by Financial Advisers and clients and prospects of the Financial Adviser. It should not be reproduced, copied or made available to anyone else. The information in this factsheet is for illustrative purposes only and does not provide sufficient information on which to make an informed investment decision. This factsheet is not intended and should not be construed as an offer, solicitation or recommendation by Tribe to buy or sell any specific investments or participate in any investment (or other) strategy. Any potential investors must seek advice concerning the suitability of any investment in the SIMPS from their Financial Adviser. ***Please note: (i) past performance is not an indication of future performance and the value of investments and the income derived from them may fluctuate and you may not receive back the amount you originally invested and (ii) any type of impact investment will involve risk to investors capital and the expected impact or financial return may not be achieved.** The tax treatment of investments depends on each investor's individual circumstances and is subject to change in tax legislation. The performance of actual portfolios linked to this **SIMPS Portfolios** may differ from the performance of the **SIMPS Portfolios** shown here due to the variation in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits on the Investment platform. The information in this factsheet is believed to be correct but we cannot guarantee this. No representation or warranty (express or otherwise) is given as to the accuracy or completeness of the information contained in this factsheet and Tribe Impact Capital LLP ("Tribe") and its partners and employees accept no liability for the consequences of your acting upon the information contained herein.

**The ongoing charge figure (OCF) is variable and is for example purposes only. MiFID II transaction costs occur when funds buy and sell investments and are not included in the OCF. Transaction costs cover broker fees, market impact, and taxes (where applicable). As the MPS invests in third-party funds, these costs vary and are factored into net returns but shown separately from the OCF. ***From 31 October 2019 we changed our industry performance benchmark from the ARC Steady Growth to the ARC Balanced benchmark. The ARC Balanced benchmark is more reflective of our long term Strategic Asset Allocation and relative risk objective over the long term.
